

Parents, vaccines you should know about...

The National Advisory Committee on Immunizations (NACI) recommends vaccines to protect against harmful vaccine-preventable diseases.

All BC children are offered free vaccine protection against many diseases.

Additional vaccines are also recommended for purchase.

Ask your healthcare provider about your child's needs for the following vaccines:

Recommended vaccines that require purchase:

- | | |
|--|---|
| <input type="checkbox"/> Hepatitis A | <input type="checkbox"/> Meningococcal ACYW-135 |
