

5 Dose Vial

1

- Swirl vial gently in an upright position for 10 seconds
IMPORTANT: Do not shake

2

- Firmly & briskly wipe surface of vial stopper with a new alcohol swab prior to drawing up EVERY dose
- Allow to dry for 10 seconds

3

- Slowly draw up 0.5mL of vaccine
IMPORTANT: Each vial contains 5 doses
Use low density volume syringes

4

- Residual vaccine from up to 3 vials may be combined to make a full 0.5mL dose, provided they are from the same lot
Please refer to BCCDC Immunization Manual

NOTE: Vaccine can be stored at room temperature for a single period of up to **3 hours** or in fridge temperature in the vial for up to **6 hours** after first vial puncture

*After this time the vaccine **MUST** be discarded*
